
Revive Hue

Smart Film. Your Color.

Privacy technology meets design expression. Revive Hue brings the power of smart film into the world of color and brand identity. Available in a range of tinted film options, Revive Hue combines instant privacy switching with aesthetic color that transforms glass into a design feature — not just a functional one.

HOW IT WORKS

Revive Hue uses PDLC smart film technology with a colored tint integrated into the film. Like all smart film, it switches between frosted privacy and its colored transparent state with the press of a button. The color remains present in both states, adding a consistent aesthetic layer to your space.

- **Power OFF:** Frosted privacy with color tint
- **Power ON:** Transparent with color tint visible

WHY REVIVE HUE

- Design-forward — integrates your brand colors or interior palette into your glass
- Dual function — smart privacy technology with built-in aesthetic impact
- Brand identity — perfect for branded environments where color consistency matters
- Unique visual statement — colored smart film is rare and immediately attention-grabbing
- Same professional consultation and installation as all Revive products
- 15+ year lifespan — lasting color and lasting performance

IDEAL APPLICATIONS

- Retail environments and storefronts seeking branded glass displays
- Hospitality — hotel lobbies, bars, restaurants with signature color palettes
- Creative agencies, studios, and design-forward offices
- Architectural feature walls and partitions
- Brand activation installations and experiential retail
- Residential spaces with bold, contemporary interior design
